

SNAP - CON®

SCBA Connections Quick Connect

Faster cylinder filling: *SNAP - CON*® connection with push-on threads can be fully connected to an existing valve outlet with only a push and a twist. The *SNAP - CON*® feature can retract the threads when pressure is relieved, thereby permitting instant removal.

Easier operation: *SNAP - CON*® connection eliminates cross-threading. It fits on existing valve outlets. It also eliminates the physical strain of repetitive circular hand motion.

Safe to use: *SNAP - CON*® incorporates a locking sleeve that prevents accidental disconnection under pressure. High strength *SNAP - CON*® threads are mechanically drawn against the male threads as a function of pressure, hold securely at over 5 times the rated pressure and resist loosening under vibration.

***SNAP - CON*® SCBA connections can be used with all standard SCBA fill stations.**

Order Part No. *AOSZIP1* for only \$249.99 each plus shipping.
